

Gonzalo Reynoso

FullStack Developer & System Analysis

+5491132579045 | CABA, Buenos Aires, Argentina | gonzalo.reynoso9@gmail.com | github.com/gonreynoso | [linkedin.com/in/gonreynoso](https://www.linkedin.com/in/gonreynoso) | [Portfolio: gonreynoso.dev](https://gonreynoso.dev)

Full Stack Developer with experience in web application development. I have worked on various projects using a wide range of technologies, including JavaScript, React, TypeScript, Node.js, Angular, Express, SQL, Power BI and NoSQL. I have experience in version control using Git, GitHub, Gitlab, Jira, Teams, Trello, and implementing Kanban and Scrum. I am currently pursuing a degree in Systems Analysis, where I am deepening my knowledge of Java and its application in software development. I hold an advanced C1 level of English.

WORK EXPERIENCE

Front-end Developer

Sep-2024 — Present

Innevo

Santiago de Chile, Chile

I worked on a web application built with Angular, focusing on creating a dynamic and responsive user interface. My role involved developing modular components, integrating Angular Material for a cohesive design, and implementing advanced TypeScript practices. The application interacts with various REST APIs, enabling efficient data handling and ensuring a seamless user experience.

- Angular Component Development: Built reusable and optimized Angular components, following best practices.
- Angular Material Integration: Implemented Angular Material to enhance user experience and visual consistency.
- Reactive Forms: Developed dynamic and custom-validated forms using Angular Reactive Forms.
- State Management and Services: Configured Angular services to handle business logic and share data between components.
- REST API Integration: Integrated external APIs using Angular's HttpClient for CRUD operations and data display.

Administrative & IT Analyst

Aug 2020 — Apr 2024

Medicina Diagnóstica

Buenos Aires, AR

As an Administrative & IT Analyst at Medicina Diagnóstica, I focused on optimizing internal processes through the development of technological solutions, task automation, and data management. My work ranged from document digitization to customer service.

- Developed applications using Google Script to automate company payroll processes, optimizing data collection and financial processing.
- Implemented interactive dashboards with Power BI, enhancing administrative and financial data analysis in the healthcare sector.
- Designed and developed the laboratory's official website using WordPress and MySQL, ensuring accurate and up-to-date information.
- Managed digital and physical documentation in the billing department, applying methodologies to improve data organization and accessibility.
- Provided customer service support, handling patient registration and delivering clinical test results with efficiency and accuracy.
- Managed invoicing, payment tracking, and employee payroll processing, ensuring a smooth administrative workflow.

PROJECTS/INTERNSHIPS

Front-end Developer, Informental (informental.com.ar)

Nov 2023 — Dic 2023

- Collaborated in transitioning the application from PHP to React.
- Developed the web version of the application, working on the design of various tabs, data forms, and charts.
- Worked with the Informental team to improve user experience by optimizing performance and integrating React and Node.js technologies.
- Achieved a 15% reduction in loading times by optimizing code using React Server Components.
